github.com/way2jatin

Programming Skills

Java, XML, Kotlin, SQL, Dart

Tools & Technologies

Android Studio, IntelliJ IDEA, Visual Studio Code, Git, Gitlab CI, Github Actions

Frameworks

Java Development Kit (JDK), Android SDK, Jetpack Compose, Flutter

Technical Skills

REST, JSON, WebSockets, Google PlayServices API, Facebook SDK, Firebase, Git, MVVM, Clean Code Arch, Retrofit, RxJava, Coroutines, Koin, Hilt, GSON, GraphQL, Postman

Testing

JUnit, Espresso, Mockito, Robolectric,

Summary

Senior Android Developer with 10 years of experience in building high-performance mobile applications using Java, Kotlin, and Jetpack Compose. Skilled in RESTful APIs, Firebase, MVVM, Clean Architecture, and CI/CD automation. Strong expertise in test coverage, Agile methodologies, and delivering scalable, user-centric solutions.

Work Experience

2023-11 - Present

Senior Mobile Developer

[Planta](#)

- Developed intelligent plant care algorithms for 7M+ users, integrating local weather data to optimize plant health and enhance user experience.
- Improved app performance by reducing crash rates by 30%, load times by 25%, and achieving 80% test coverage through test-driven development.
- Designed and implemented new features using **Kotlin**, **MVVM architecture**, and **Jetpack Compose**, collaborating with UX designers and product teams to deliver engaging features like plant community and Care Share.
- Conducted code reviews and mentored junior developers, fostering a culture of technical excellence and innovation.

2020-12 - 2023-07

Senior Mobile Developer

[LottieFiles](#)

- Design and implement specific features using **Kotlin** and **MVVM architecture**
- Implemented performance improvements, such as reducing app load times and optimizing memory usage, to enhance the user experience.
- Collaborated with UX designers to create user-friendly and visually appealing mobile app interfaces using both XML & Jetpack Compose.
- Conducted code reviews and provided feedback to other developers to ensure high code quality.

2019-04 - 2020-11

Software Engineer II

[AirAsia](#)

- Handling various technical aspects like developing modules according to the design specifications, fixing defects & analyzing the root cause.
- Coordinating with cross functional teams for integration and system maintenance in multiple locations.
- Developed update patches, modules and components for different applications.
- Worked on a few POC's which were developed in **Flutter**.

2018-04 - 2018-12

Software Engineer(Android)

[GlobalDCX](#)

- Worked as part of a team to develop a cryptocurrency trading app built for Android platform & collaborated with cross functional teams to define, design & launch new features.
- Partnered with QA Engineers & internal developers to maintain best practices.
- Tested code for robustness; executed edge case, usability, & general reliability analysis.
- Fixed bugs & improved application performance.

2015-09 - 2018-03

Software Engineer(Android)

[UrbanWand](#)

- Worked as part of the founding team & an Android Developer, to manage design, development, testing & deployment of multiple android applications supporting both Tablets & Mobiles.
- Took care of aspects like UX, performance, memory footprint & reliability over intermittent networks.
- Was also responsible for managing the development of API's built in Java which were used in the Android App.

Education

2011-08 - 2015-05

Bachelor of Technology

[SRM University](#)

Bachelor of Technology - SRM University Chennai, Aug 2011- May 2015
Computer Science & Engineering - CGPA 8.1
